ABOUT ZIPCLIP

WHO IS ZIP-CLIP?

We are manufacturers and designers of high-spec suspension systems for all your HVAC, Electrical, Mechanical & Signage requirements.

WHAT IS IT?

It is a range of innovative products designed for speed and ease of use. The clip is manufactured from a high quality zinc alloy. The oil impregnated sintered metal wedge is designed to offer the best locking solution. The stainless steel spring ensures the wedge engages first time. The galvanised high tensile wire rope supplied offers you a better SWL than those found on the market. All our engineered suspension products are designed with quality and safety in mind.

TESTED?

All our products are independently tested off site by NEL/TUV, MELBTEST, NATA, SATRA, Lloyds British and Apave and all clips are UL certificated. For copies of our test certificates please contact our offices or download them from our website - www.zip-clip.com

THE PROFESSIONAL CHOICE

Zip-Clip has created a "Professional Choice" range of suspension systems all of high specification. You can easily spot this range of products throughout the Zip-Clip catalogue thanks to the Professional Choice symbol.

WHAT ARE THE ADVANTAGES OF USING A ZIP-CLIP WIRE SYSTEM?

Using a wire rope suspension system provides many advantages:

- Key free release system
- Easier to transport
- 100 metre coil is equivalent to 30 x 3 metre lengths of threaded rod
- Easier to handle
- Cold cut, no hot work permit required
- Vibration reduction: threaded rod has a vibration absorption of 50%, whereas wire rope hangers absorb vibration in excess of 75%.
- Reduced labour cost
- Reduced risk of injury
- Aesthetical
- Reduces individual components (ie nuts, washers, square plates, rod...)
- Reduces impact on the environment

WHERE CAN I USE A WIRE SYSTEM?

HVAC AND MECHANICAL

- Spiral Ducting
- Rectangular Ducting
- Radiant Heat Panels
- Fan Coil Units
- Chilled Beams
- Gas pipes
- Water Pipes

SPECIALIST

- Seismic areas
- Christmas decorations
- Accoustic supports
- Pest control
- Museum installations
- Exhibition installations
- Retail displays
- Stainless Solutions

ELECTRICAL

- Luminaires
- Busbar
- Cable Basket
- Cable Ladder
- Trunking
- High Bays
- CCTV Cameras
- Secondary Support
- Sound Systems

*For specialist applications, please contact our technical department on 0044 1686 623366

MANUFACTURERS RECOMMENDATIONS?

Zip-Clip's unique system is designed to support **static loads only**. Dynamic and shock loadings can greatly increase the overall weight of the product being suspended and therefore can compromise the Safe Working Load of the suspension.

- To ensure integrity and safety of the systems only Zip-Clip cable should be used
- Do not exceed the Safe Working Load of the product
- Do not use coated cable
- Do not paint or apply any other coating
- Do not apply lubricant
- Do not use for lifting
- Remove any damaged cable end prior to inserting into the clip

All stated Safe Working Loads and certifications are based on the product being used in conjunction with our high tensile Zip-Clip wire. Zip-Clip are not able to guarantee the Safe Working Load of a product used with a non Zip-Clip wire and cannot support projects where non Zip-Clip wire has been used.

HOW IT WORKS

- Pass the wire through the zip-clip
- Loop the wire through or around the anchor point
- Pass the wire back through the zip-clip allowing 15cm of wire protruding
- Apply tension
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction of the arrows indicated on the zip-clip
- To adjust, take the load off and pull the tail slightly to disengage the teeth, then release using the adjustment pin - no tools required

The KL200 can be used to make a figure of eight suspension, using one clip:

- Pass the wire into the "through hole" in the KL200 and then around your fixing or anchor point. Pass the wire end now through the locking channel in the KL200 and pull through 15cm of free wire
- Pass the other end of the wire through your bracket or around your suspension and back through the locking channel again, allowing 15cm of free wire through the clip
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction of the arrows indicated on the zip-clip
- Prior to load being applied, the wire can be adjusted in either direction.

With the load off the wire and the KL200 zip-clip, push the release pin in the direction of the arrow on the zip-clip. This will release the locking wedge and allow the wire rope to be moved freely on either direction. After a load has been applied, it may be necessary to pull the cable slightly to disengage the teeth on the wedge. Be sure the load is fully supported before attempting adjustment.

RIZE

THE SPECIFICS

The range consists of a range of wire reels and clips with a choice of Safe Working Loads:

- G 10kg SWL
- S 50kg SWL
- Y 120kg SWL
- P 230kg SWL
- N 500kg SWL

THE APPLICATIONS

- Wrap around applications
- Suitable for use with a wide range of fixing brackets including: UNI1, UNI2, UNI3, CLA1, MA6810, T920514
- Cold Room Ceilings
- Trapeze Brackets
- Available with stainless steel wire for specialist applications

THE TECHNICAL INFORMATION

- Key free release system
- No pre-site visits required
- Ideal for long drop lengths
- Any spare material can be used on following projects
- Only wire cutter required
- Can be used as a wrap around application and with a wide range of brackets.
- Wire supplied in dispensing box - avoiding risk of wire bird nesting

Zip-clips are also available in a lockable version offering a tamper proof installation.

The Installation:

- Unscrew the M4 locking nut and bolt until the adjustment pin is pushed back fully.
- Pass one end of the wire through the zip-clip in the direction of the arrow and draw enough wire to around your fixing point.
- Pass the wire back through the zip-clip leaving at least 15cm of wire protruding.
- Tighten the M4 locking nut and bolt until the adjustment can no longer be moved

THE INSTALLATION

- Cut wire to desired length for the drop required
- Pass one end of the wire through the zip-clip in the direction of the arrow and draw through enough wire to go around your fixing point
- Pass the wire end back through the zip-clip leaving at least 15cm of free wire protruding
- At the other end again pass the wire through the zip-clip in the direction of the arrow
- Pass the free end of wire around your suspension or through your fixing and back through the zip-clip leaving 15cm of wire protruding.
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

ZIP-LOCK

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg
- S 50kg
- Y 120kg

The system consists of wire and zip-clip with a friction free eye termination.

THE APPLICATIONS

Suitable for wrap around installations including:

- Beams
- Purlins
- Roof Trusses
- And all other existing features

THE TECHNICAL INFORMATION

- Key free release system
- Precision Swaged Eye
- Frictionless system – No wire on wire
- Simple to use
- DW144 approved
- Trivalent zinc and clear galvanised
- Suspension can be inverted
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 Standard

THE INSTALLATION

- Pass the wire around your purlin or beam
- Pass the free end of the wire through the eye to create a friction free fixing
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrow's indicated

THE RANGE

The system consists of wire and zip-clip with a friction free eye termination.

LOOP-IT

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg SWL
- S 45kg SWL
- Y 90kg SWL
- P 200kg SWL
- N 500kg SWL

The system consists of wire and zip-clip with a ferruled loop termination.

THE APPLICATIONS

Suitable for wrap around applications including:

- Beams
- Purlins
- Roof Trusses
- And all other existing features

THE TECHNICAL INFORMATION

- Key free release system
- Simple to use
- Suspension can be inverted
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 standard

THE INSTALLATION

- Pass the wire around the purlin or beam
- Pass the free end of the wire through the loop
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around the required suspension and back through the zip-clip leaving 15 cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with a ferruled loop termination.

CON-LOCK

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg
- S 50kg
- Y 90kg

The system consists of wire and zip-clip with a CLA1 concrete anchor termination.

THE APPLICATIONS

Suitable for concrete applications including:

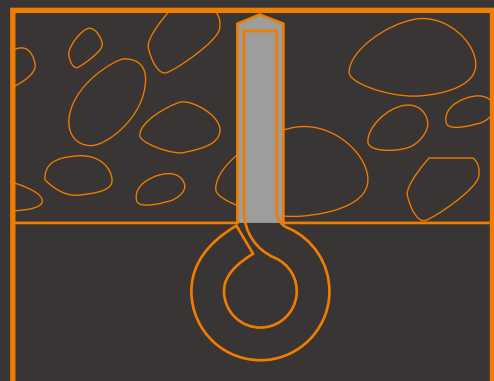

- Cracked concrete
- Reinforced concrete
- Slagged concrete
- Hollow pot

THE TECHNICAL INFORMATION

- Key free release system
- No claw back required
- Nail anchor for hammer set installation
- The installed nail anchor expands automatically under load, pulls the cone into the expansion clip and expands against the wall of the concrete.
- Can also be supplied with a double drop
- Shallow embedment
- ETA approved
- BS8539 Compliant
- High tensile galvanised wire 1960 N/mm² grade 7 x 7 construction
- BSEN 12385 standard

THE INSTALLATION

- Drill a 6mm hole to a minimum depth of 30mm
- Blow the hole clean of dust and debris
- Hammer in the fixing
- Anchor is now fixed, no claw back required
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

BS8539 Compliant

THE RANGE

The system consists of wire and zip-clip with a CLA1 concrete anchor termination.

ANCHOR-IT

THE SPECIFICS

The range consists of a predetermined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg SWL
- S 35kg SWL

The system consists of wire and zip-clip with a ferruled CLA2 concrete anchor termination

THE APPLICATIONS

Suitable for concrete applications including:

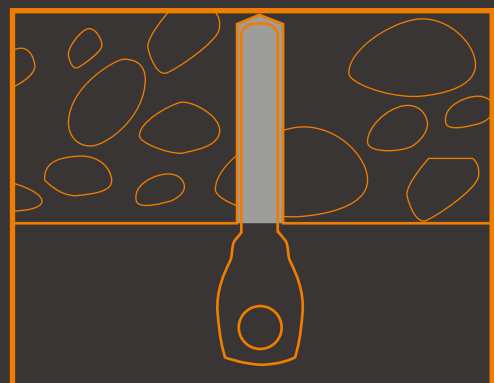

- Solid brick
- Compressive resistant stone
- Reinforced concrete
- Slagged concrete C15/C35

THE TECHNICAL INFORMATION

- Key free release system
- Vibration resistant
- Zinc plated pre-expanded through bolt
- 30mm long
- 5mm wide
- 6mm head width
- 30mm embedment depth
- 5mm drill diameter required
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 standard

THE INSTALLATION

- Drill a 5mm hole to a minimum depth of 30mm
- Blow the hole clean of dust and debris
- Drive the anchor into the hole until the head is firmly seated against the base material. Be sure the anchor is driven to the required embedment depth.
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding.
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with a ferruled CLA2 concrete anchor termination.

THREAD-IT

THE SPECIFICS

The range consists of a predetermined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg SWL - M6 x 20 threaded end
- S 45kg SWL - M6 x 45 or M8 x 25 threaded end
- Y 90kg SWL - M8 x 25 threaded end

The system consists of wire and zip-clip with a choice of M6 or M8 threaded termination.

THE APPLICATIONS

Suitable for:

- Concrete
- Lindapter wedges
- Busbar
- Lighting trunking
- Ducting
- Cable management
- Signage

THE TECHNICAL INFORMATION

- Key free release system
- Comes with M6 or M8 eyebolt as standard
- Other eyebolts available on request
- Suspension can be inverted
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 standard

THE INSTALLATION

- For use in concrete, ensure that the drop in anchor is correctly fixed then thread the M6/M8 stud into place
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- The stud can be used in reverse configuration and threaded into the product to be suspended
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with a choice of M6 or M8 threaded termination.

DEC-LOCK

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Loads:

- G 10kg
- S 50kg

The system consists of wire and zip-clip with a decking fixing termination.

THE APPLICATIONS

Suitable for decking applications including:

- Kingspan Structural Products
- Structural Metal Decks (SMD) and other steel decking manufacturers

THE TECHNICAL INFORMATION

- Key free release system
- All components are fully assembled
- No onsite assembly required
- Lockable system, no drilling required
- Suitable where access to purlin is not available
- CNC engineered M6 x 45mm eyelet
- Trivalent zinc and clear galvanised eyelet, nut and washer
- High tensile galvanised wire 1960 N/mm² grade 7 x 7 construction
- BSEN 12385 Standard

THE INSTALLATION

- Push the end fixing into decking profile and turn through 90 degrees
- Screw the eyebolt to the top of the decking profile
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with a decking fixing termination.

KNOCK-IT

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg SWL
- S 35kg SWL

The system consists of wire and zip-clip with a purlin fixing termination.

THE APPLICATIONS

Knock onto purlin

Suitable for:

- Lighting
- Plenum boxes
- Chilled Beams
- Radiant heat panels
- Metal cladding
- Thin tin roofs
- Cable tray
- Acoustic boards

THE TECHNICAL INFORMATION

- Key free release system
- Available with both 1-5mm and 5-7mm purlin clips as standard
- Other hangers available on request
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 standard

THE INSTALLATION

- Hook purlin clip over the lip of the purlin. Strike with hammer to ensure a secure fixing.
- Pass the wire through the zip-clip in the direction of the arrow.
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding.
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrow's indicated

THE RANGE

The system consists of wire and zip-clip with a purlin fixing termination.

Please ensure the loadings are within the purlin manufacturers guidelines.

If a higher loading is required please refer to our wrap around systems.

TOGGLE-IT

THE SPECIFICS

The range consists of a predetermined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg SWL
- S 35kg SWL
- Y 90kg SWL

The system consists of wire and zip-clip with a toggle termination.

THE APPLICATIONS

Suitable for:

- Lighting
- Plenum boxes
- Chilled beams
- Radiant heat panels
- Metal cladding
- Thin tin roofs
- Cable tray
- Acoustic boards

THE TECHNICAL INFORMATION

- Key free release system
- Three different toggles available to suit light and medium weight applications
- BZP toggles
- Suspension can be inverted
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 standard

THE INSTALLATION

- By inverting the toggle parallel to the wire it will swing through 90 degrees
- Push into the product being suspended
- Ensure hole is no larger than 12mm diameter
- Pass the free end of the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with a toggle termination.

SNAP-IT

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

- G 10kg SWL
- S 45kg SWL
- Y 90kg SWL

The system consists of wire and zip-clip with an eyelet carabiner termination.

THE APPLICATIONS

Suitable for:

- Snapping onto purlin hangers
- Chilled beams
- Lighting
- Heating panels
- Signage
- Attaching to existing structures

THE TECHNICAL INFORMATION

- Key free release system
- Simple to use
- 5 x 50 on G and S range and 6 x 60 on Y range BZP carabiner hook
- Eyelet prevents accidental un-hooking of carabiner from wire
- Maintenance friendly
- Suspension can be inverted
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 standard

THE INSTALLATION

- Snap the carabiner onto the purlin hanger or product to be supported
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with an eyelet carabiner termination.

UNI-LOCK

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Loads:

- G 10kg (Gas Nail / Screw)
- S 50kg SWL

The system consists of wire and zip-clip with a right angle bracket termination.

THE APPLICATIONS

Suitable for:

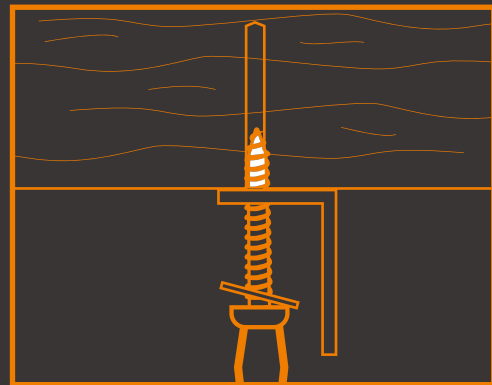

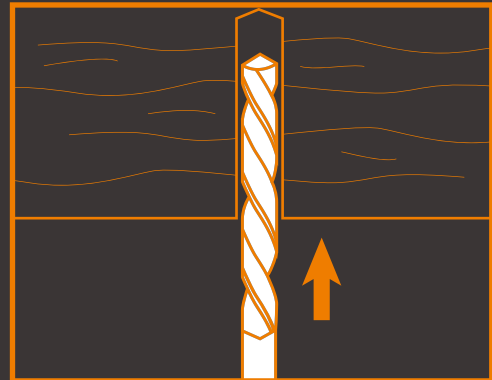

- Concrete Slab
- Metal decking and other steel structures
- Wooden structures

THE TECHNICAL INFORMATION

- Key free release system
- Suitable for both plug and screw and shot fire applications
- Tear drop shape allows for wire to rotate through 180° in the bracket for angled applications
- Wire rotation reduces pressure on the nail when service is not directly below anchor point
- Trivalent zinc and clear galvanised
- Fix with:
 - » Wood screw
 - » Plug and screw
 - » Concrete screw
 - » Tek screw
 - » Gas/Pat nail
- Suspension can be inverted
- High tensile galvanised wire 1960 N/mm² grade 7 x 7 construction
- BSEN 12385 Standard

THE INSTALLATION

- For timber applications, pre-drill timber and use a screw to fix through the bracket
- For steel and concrete applications use self tapping fixing or a gas nailer with a suitable nail
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with a right angle bracket termination.

BRACKET SIZES ALSO AVAILABLE:

IMAGE	PRODUCT CODE	DESCRIPTION
	HCB2	90 Degree bracket with 7.0mm and 5.0mm hole, 1.3mm gauge suitable for S wire
	HCB3	90 Degree bracket with 6.5mm holes, 2.0mm gauge suitable for Y wire

SHOT-LOCK

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Loads:

- G 10kg
- S 25kg

The system consists of wire and zip-clip with a shot fire termination complete with a ballistic point.

THE APPLICATIONS

Suitable for fixing substrates including:

- Concrete slab
- Profile steel decking
- Steel Beams. SFN19 metal nail required

THE TECHNICAL INFORMATION

- Key free release system
- Available in single or double wire drop
- Eliminates drilling
- Tear drop shape allows for wire to rotate through 180° in bracket for angled applications
- Wire rotation reduces pressure on nail when service is not directly below anchor point
- Ballistic point nail compatible with a range of Powder Actuated Tools (PAT)
 - » Hilti DX460
 - » Hilti DXA40
 - » Hilti DXA41
 - » Hilti DX351
 - » Spit P200
 - » Spit P370
- High tensile galvanised wire 1960 N/mm² grade 7 x 7 construction
- BSEN 12385 Standard

THE INSTALLATION

- Ensure substrate is suitable for nail and cartridge
- Locate nail into the barrel of the Powder Actuated Tool
- For firing follow the gun manufacturers' guidelines
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire and zip-clip with shot fire termination complete with a ballistic point.

PLUS ON-WIRE

THE SPECIFICS

The range consists of a pre-determined length of wire with either a loop, concrete anchor or M8 eyebolt.

- 90kg SWL (concrete anchor)
- 100kg SWL (loop or eye fixing)
- Locking C-Clip
- C-Clip to prevent upward movement
- High tensile wire rope 1-10m
- Red safety cap

The system consists of wire and plus clip with either a loop, concrete anchor or M8 eyebolt termination

THE APPLICATIONS

Suitable for supporting:

- Heavy duty single and multi-tier trapeze brackets
- Modular Systems
- Rectangular Ducting
- Ladder Rack

THE TECHNICAL INFORMATION

- Key free release. No tools required
- Flexible, ideal if anchor point is not straight above
- Easy to cut
- Speed of installation
- Fully lockable into slotted channel
- Zamac 5 housing incorporating oil impregnated sintered steel wedge
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 Standard

THE INSTALLATION

- Loop, screw or drill your end into or around your chosen anchor point
- Position, if required, the C-Clip onto your wire
- Position plus clip into channel and slide the wire through the clip
- To adjust simply remove the C-Clip and release the load from the Plus clip by pushing the clip up the wire. Then simply pull down on the release key at the same time

THE RANGE

The system consists of wire and plus clip with either a loop, concrete anchor or M8 eyebolt termination. Designed for heavy duty trapeze brackets.

CHAN-LOCK

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Loads:

- G 10kg SWL (on request)
- S 20kg SWL

The system consists of wire, zip-clip and a push fit Chan-Lock hanger with either a ferruled loop, concrete anchor or M6 eyebolt termination.

THE APPLICATIONS

- Single tier lightweight trapeze brackets
- Compatible with slotted channel

THE TECHNICAL INFORMATION

- Key free release system
- Galvanised spring metal
- Designed for 41x41 and 41x21 channel
- Short leg to eliminate overhang
- Tool free installation
- Posi-Fit push fit system
- Can be inserted into channel with slots facing either up or down

THE INSTALLATION

- Simply push the Chan-Lock into the strut, ensuring that the short leg is at the cut end of the channel
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of wire, zip-clip and a push fit Chan-Lock hanger with either a ferruled loop, concrete anchor or M6 eyebolt termination

System MUST NOT be overloaded
Ensure services are loaded evenly

TRY-LOCK

THE SPECIFICS

The range consists of two pre-determined lengths of wire to support basket and tray with the following choice of Safe Working Loads:

- G 10kg (on request)
- S 50kg

Designed to be used in conjunction with Rize, Zip-Lock, Con-Lock, Dec-Lock, Shot-Lock and Uni-Lock

THE APPLICATIONS

Suitable for suspending containment and bracketry:

- Cable Basket
- Cable Tray
- Channel Supports
- Chilled Beams
- Radiant Heat Panels

THE TECHNICAL INFORMATION

- Reduces the use of studding and channel
- One fixing point per drop
- Allows for side loading
- Height can be adjusted at basket and not at fixing
- Can be fixed to basket at ground level
- Plastic protection sleeve preventing wire on wire friction
- 5 x 50 BZP carabiner hook
- Eyelets prevent accidental un-hooking of carabiner from wire
- High tensile galvanised wire 1960 N/mm² grade 7 x 7 construction
- BSEN 12385 Standard

THE INSTALLATION

- The attachment of the Try-Lock system can be done at ground level
- Clip the carabiner to one side of the basket or cable tray
- Clip the other carabiner to the other side of the basket or cable tray
- Pass the free end of the wire from your top suspension through the zip-clip in the direction of the arrow
- Pass through the plastic protected loop of the Try-Lock and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated
- Legs should not exceed 60 degrees

THE RANGE

Service support to be used in conjunction with RIZE, Zip-Lock, Con-Lock, Dec-Lock, Shot-Lock and Uni-Lock, reducing the use studding and channel

TRY-LOCK

PRODUCT CODE	DESCRIPTION	SWL	PACK QTY.
TRS50-200	Eyelet carabiner suspension system suitable for spans of 50-200mm	50kg	10

TRS50-200 A = 300mm
 TRS300-400 A = 460mm

LUMA-LOCK

THE SPECIFICS

The range consists of pre-determined lengths of wire for the installation of primary and secondary installations with a choice of Safe Working Loads:

- G 10kg SWL
- S 35kg SWL

Designed to be used in conjunction with Rize, Zip-Clip, Con-Lock, Dec-Lock, Shot-Lock and Uni-Lock

THE APPLICATIONS

Suitable for primary and secondary support for suspending:

- Lighting Fittings
- Heat Panels
- Plenum Boxes
- Basket, Ladder and Tray

THE TECHNICAL INFORMATION

- Reduces the use of studding and channel
- One fixing point per drop
- Can be fixed to installation at ground level
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 Standard

THE INSTALLATION

- The attachment of the Luma-Lock system can be done at ground level
- Attach the two toggles through the rear of the system being suspended
- By inverting the toggle parallel to the wire the toggle will swing through 90 degrees
- Ensure hole is no larger than 12mm diameter
- Pass the free end of the wire from your top suspension through the zip-clip in the direction of the arrow
- Pass through the plastic protected loop of the Luma-Lock and back through the zip-clip leaving 15cm of wire protruding
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated
- Legs should not exceed 60 degrees

THE RANGE

Service support to be used in conjunction with RIZE, Zip-Lock, Con-Lock, Dec-Lock, Shot-Lock and Unit-Lock, reducing the use studding and channel

LUMA-LOCK

PRODUCT CODE	DESCRIPTION	SWL	PACK QTY.
LUMG50-200	Toggle suspension system suitable for spans of 50-200mm	10kg	10

LUM300-400	Toggle suspension system suitable for spans of 300-400mm	35kg	10
LUM600	Toggle suspension system suitable for spans of 600mm	35kg	10

- LUMG50-200 A = 300mm
- LUMG300-400 A = 460mm
- LUMG600 A = 550mm
- LUM50-200 A = 300mm
- LUM300-400 A = 460mm
- LUM600 A = 550mm

THE SPECIFICS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Load:

Carabiner end:

- S 50kg SWL
- Y 90kg SWL

Toggle end:

- G 10kg SWL
- S 35kg SWL
- Y 90kg SWL

The system consists of a pre-determined length of wire with a second ferruled leg and a choice of either carabiner or toggle ends.

THE APPLICATIONS

Carabiner end:

- Cable basket
- Cable tray
- Channel supports
- Chilled beams
- Radiant heat panels

Toggle end:

- Lighting fittings
- Heat panels
- Plenum boxes
- Basket, ladder and tray

THE TECHNICAL INFORMATION

- Key free release system
- High tensile galvanised wire 1960N/mm² grade 7 x 7 construction
- BSEN 12385 standard
- One fixing point per drop
- Allows for side loading
- Can be fixed at ground level
- Reduces the use of studding and channel
- Ideal for short suspensions

THE INSTALLATION

Installing the carabiners:

- Clip one carabiner to one side of the basket or tray to be suspended
- Clip the other carabiner to the other side of the basket or tray

Installing the toggles:

- Attach the two toggles to the rear of the system being suspended
- By inverting the toggle parallel to the wire the toggle will swing through 90 degrees
- Ensure hole is no larger than 12mm diameter
- Pass the free end of the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension point and back through the zip-clip leaving 15 cm of wire protruding.
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

The system consists of a predetermined length of wire with a second ferruled leg and a choice of either carabiner or toggle ends.

SPAN-LOCK

THE SPECIFICS

Span-Lock and Zip-Grip are designed to be used in conjunction so as to create a complete catenary system.

Span-Lock is available in 5, 10, 15, 20, 30 and 40 metre lengths, with a choice of Safe Working Loads:

- Y 30kg SWL
- P 75kg SWL
- N 100kg SWL

THE APPLICATIONS

Suitable for:

- Lighting
- Lighting trunking
- Bus bar
- Radiant heat panels
- Fabric Ducting
- Signage
- Lightweight ductwork

THE TECHNICAL INFORMATION

- Key free release system
- Designed to traverse between two fixed anchor points
- Safe on-site installation, no channel cutting or hot work permit required
- Simple and easy to handle and transport
- Comes with two locking mechanisms
- Suitable for applications where no overhead fixing points are available.

Zip-Clip is able to offer a comprehensive catenary calculation service. Please contact our technical team on +44 1686 623366 for more information

When fixing from purlins, always consult with the purlin manufacturer to advise loading capabilities, in conjunction with using the Zip-Clip calculation service.

THE INSTALLATION

- Secure each end of the Span-Lock wire to a fixed anchor point using the zip-clips supplied
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Use a tensioning tool to apply tension to the wire
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

Span-Lock and Zip-Grip are designed to be used in conjunction to create a complete catenary system.

Ensure a distance of at least 1.6 x the height of the beam is left between the zip-clip and the structure. Do not exceed an angle of 60°

ZIP-GRIP

THE SPECIFICS

Span-Lock and Zip-Grip are designed to be used in conjunction so as to create a complete catenary system.

Zip-Grip is available in 1 to 10 metre lengths, with a choice of Safe Working Loads:

- G 10kg SWL
- S 35kg SWL

Available in M6 to fit Y and P Span-lock range and M8 to fit the N range

THE APPLICATIONS

Suitable for:

- Lighting
- Lighting trunking
- Bus bar
- Radiant heat panels
- Signage
- Fabric ducting
- Lightweight ductwork

THE TECHNICAL INFORMATION

- Key free release system
- Simple hook and lock system
- Ability to suspend many products, even at angles
- Easy slide for adjustment into final position
- Can be fitted retrospectively up to the SWL
- Can be simply inverted to offer extra support to the Span-Lock range
- Suitable for applications where no overhead fixing points are available

THE INSTALLATION

- Place the Zip-Grip onto the tightened wire and slide into place
- Tighten the eye until engaged on the Span-Lock wire, then tighten the locking nut to secure place
- Pass the free end of the wire through the supplied zip-clip around the object to be suspended then back through the zip-clip
- Pass the wire through the zip-clip in the direction of the arrow
- Pass through or around your required suspension and back through the zip-clip leaving 15cm of wire protruding
- Height can then be adjusted
- To reduce deflection in the wire the Zip-Grip can be inverted and fixed from the structure above
- Always confirm engagement of the zip-clip on the wire by pushing the pin in the opposite direction to the arrows indicated

THE RANGE

Span-Lock and Zip-Grip are designed to be used in conjunction to create a complete catenary system.

H-FRAME

THE SPECIFICS

The Zip-Clip H-Frame systems are designed to fit UNISTRUT channel and has a cross compatibility with all UNISTRUT type brackets.

- H-Frame 700kg/kit SWL
- Base Frame 700kg/kit SWL
- Extender Frame 350kg/kit SWL

A range of roofing supports designed for AHUs without penetrating the roof membrane

THE APPLICATIONS

Suitable for:

- Suitable for:
- Roof mounted services
- Cable tray
- Cable Basket

THE TECHNICAL INFORMATION

- No penetration of waterproof membrane
- Anti vibration pads attached to feet
- Easy to install and adapt
- High Density Polyethylene
- Each foot is made from a linear Polymer, High Density Polyethylene (HDPE) and is prepared from ethylene by a catalytic process
- The absence of branching results in a more closely packed structure with a higher chemical resistance than LDPE.
- HDPE is harder and more opaque and can withstand higher temperatures (120°C for short periods, 110°C continuously)

THE INSTALLATION

THE RANGE

A range of roofing supports designed for AHUs without penetrating the roof membrane.

PREFABRICATION

SPECIALIST APPLICATIONS

Zip-Clip Ltd is renowned for its unique problem solving solutions. Over the past number of years we have designed and developed a range of systems tailored to overcome troublesome applications. With our highly trained technical managers and our extensive knowledge of the fixings market we can confidently design a solution for your requirements. Examples of our abilities are as below:

TUNNEL SOLUTION

A solution was found for the Hatfield and Hindhead road tunnels for the suspension of a linear heat detection cable. The solution was required as the linear cable did not travel in a straight line due to the ventilation and lighting equipment in its path. Zip-Clip were able to develop a bespoke low carbon stainless steel solution designed for this harsh environment that could be installed quickly with minimum disruption.

INTERNALLY CLADDED BUILDINGS

With the increasing number of internally cladded buildings being specified, finding a suitable anchor point is not always possible. Zip-Clip designed a solution for the Pirelli Tyre Distribution Centre in Burton-on-Trent by utilising a unique self tapping anchor which did not affect the integrity of the cladding.

Zip-Clip is able to provide special products for many applications. Among others:

- Seismic areas
- Christmas decorations
- Acoustic supports
- Pest control
- Museum installations

Each drawing is tailored for specific needs. A unique number is attributed to each drawing, allowing ease of re-ordering and product continuity.

CALCULATION SERVICES

Zip-Clip are able to offer a free of charge drawing calculation service

Step 1:

E-mail your drawing to info@zip-clip.com

Step 2:

Our technical department will contact you with a few simple questions

Step 3:

A full recommendation and quotation will follow. A unique project drawing number will be issued for reference.

The Zip-Clip Drawing Calculation Service is proving to be a big success with contractors.

ON-SITE PULL TESTS

To add peace of mind to our already independently tested systems we offer an on-site pull test which will be validated and certified by **fischer** . With so many variants in concrete (ie flint, pebbles...), this unique free service is very reassuring.

ARCHITECTURAL SUPPORTS

Zip-Clip also supplies a full range of aesthetically pleasing cable supports. The systems are safe and easy to use with finger tip adjustment for precise height adjustment with no tools required. The product is ideal for supporting lighting systems, cable management, store displays and signage.

SPECIALIST SUPPORT BRACKETS

Zip-Clip have developed a number of specialist brackets to enable the installer to suspend both HVAC and M & E services as quickly as possible. Zip-Clip designed these systems to not only speed up installations but also to reduce the need for assembly on site. These support brackets can also be used in conjunction with modular designed systems.

A brief example of the large number of designed brackets include:

PIPE BRACKET:

This can be designed to your specification for suspending both pipe work and cable tray from one anchor point

BRACE BRACKET:

This bracket can be used as a primary installation or as a retrofit solution. The brackets can be used in conjunction with a choice of anchors

SPECIFICATIONS

GALVANISED WIRE

WIRE CODE	MBL OF WIRE ROPE	CONSTRUCTION	TENSILE STRENGTH
G	78kg	7x7 (6/1) RHRL	1960N/mm ²
S	290kg	7x7 (6/1) RHRL	1960N/mm ²

P	200kg	AISI 316

ANGULAR PERFORMANCE

The table below shows the effect on the Safe Working Load when working at an angle from the vertical when using the professional choice range.

WIRE CODE	VERTICAL	15°	30°	45°	60°
G	10kg	9.6kg	8.6kg	7.0kg	5.0kg
S	50kg	48.0kg	43.0kg	35.0kg	25.0kg
Y	120.0kg	115.2kg	103.2kg	84.0kg	60.0kg
P	230kg	220.8kg	197.8kg	161.0kg	115.0kg
LOAD	100%	96%	86%	70%	50%

The high tensile wire we supply is galvanised and manufactured to the highest standards incorporating a 7 x 7 construction, meeting the BSEN 12385 standard.

BSMA 29/1983 standard also meeting the AISI 3136 requirements

The diagram to the left shows the construction of the 7x7 wire braids.

The diagram to the right shows the construction of the 7 x 19 wire braids.

ENVIRONMENT

Zip-Clip Ltd recognizes that its activities impact on the environment at local, regional and global levels and acknowledges a responsibility for the protection of the environment and of the health and safety of its employees and the wider community

ZIP-CLIP LTD IS COMMITTED TO:

Promoting the protection of the environment and minimizing the impact of all its activities upon each of the local, regional and global environments both directly and through its influence on others.

Contributing to a sustainable and healthy future by conserving natural resources and by minimizing avoidable waste and pollution.

Reducing the use of fossil fuels through improvements to energy efficiency and the substitution of renewable energy resources.

Developing effective waste management and recycling procedures and using recycled and recyclable materials where possible.

Increasing awareness of environmental responsibilities amongst staff.

TO ACHIEVE THESE GOALS WE WILL:

Educate and train staff in environmental matters as appropriate.

Progressively reduce the amount of waste generated.

Market products, which create a minimum environmental damage, and use its purchasing to influence to:

Promote production of such products.

Ensure that all public communications are true and unambiguous.

Respect the interests of neighbours and the world community.

Review our policies as an ongoing matter.
